

## Football

I like football because you run, fall, and get hurt. Football is my favorite sport in the world because it can entertain you, and you can play it.

When I play my throwing game I like to play tackle because two touch is just plain boring. I think football is the best sport ever invented. When I watch my favorite tackle team play I have so much suspens.

One time I flipped my friend over by jumping down on the floor and he tripped over me and he flipped. Tackle is sometimes dangerous by trying to flip someone or pushing. The first time I ever tried to play the best game of all is when I was 7. I saw people on the floor and it looked scary!

I wonder if I could be a professional football player because they are on tv. and get paid lots of money. I hope I can be a professional football player one day.
